Please RSVP to Julie Simon

(714) 456-3474 ♦ [jmsimon@uci.edu](mailto:jmsimon@uci.edu)

This event is open to all patients, family members, and those involved  
in the healthcare of these patients

Dr. Slonim, from the Columbia University Medical Center, has long specialized in genetic errors of metabolism. By investigating these disorders, he has devised therapies, consisting of special nutrition, exercise and hormones, that attempt to correct metabolic disturbances. The therapies have resulted in marked clinical improvement in many disorders. Consequently, Dr. Slonim's clinical research program attracts patients from all over the world seeking effective therapies for their rare disorders.

Supported by an educational grant from Genzyme Corporation
